**Control ID:** # 3837539

**Abstract Title:** Evaluation of photoinduced capacitance in perovskite solar cells by DC method

Dear Satoshi Uchida:

We are sorry to inform you that your abstract has not been selected for the 2023 MRS Spring Meeting held April 10 - 14, 2023.

We hope that this decision does not deter you from attending as presenting at the conference is only one facet of the experience. The opportunity to network with others in your area of interest is also extremely valuable. Throughout the meeting, there will be ample time for exchange of information and general discussion with your colleagues.

If you have updates or additional research findings that you would like to present, please consider submitting your work to the 2023 MRS Fall Meeting & Exhibit.

We hope to see you at a future MRS meeting.
