

# Publishing Options

## **i** These are the available publishing options.

If the journal accepts your article, you can change your mind about these options.

Note: editors and reviewers can only see your selection after acceptance.

FAPbI3-Nanoparticles with ligands act synergistically in absorbent layers for high-performance and stable FAPbI3 based perovskite solar cells ▼

## Gold Open Access

### Publish as an Open Access article

Make my final published article available to everyone upon acceptance.

As there is an [agreement in place between The University of Tokyo and Elsevier](#) to cover the APC (Article Publishing Charge) for publishing Open Access, I do not have to pay an APC if **all** of the following criteria are met:

- My institution has APCs available by the time the journal accepts the article
- My institution approves using the agreement funds to pay the APC

### To pay on acceptance

**i** Only applicable if article accepted

Price

**Article Publishing Charge (APC)**      **JPY 596,980.00**

**Institutional Agreement Discount**

**-596,980.00**

---

**To pay (on validation)**

**0.00**
